

Amendments to the Specification

Applicant respectfully presents the following replacement paragraph for consideration.

Replacement paragraph for page 5, lines 7-11.

Referring also to Fig. 2, the pluralities of coils 14U, 14V and 14W connected in series in the respective phases are connected at one ends thereof individually to conductors 15U, 15V and 15W, and connected at the other ends commonly to a conductor 15N as a neutral point.
